

The cost of services for IUI/IVF varies dependent on the amount of medications, laboratory tests, and ultrasounds that may be necessary for ovulation induction and the protocol that has been assigned.

**For Patients who do not have IUI insurance coverage:** A global fee of **\$600.00** has been established for IUI. Payment is required prior to instituting cycle medications (at baseline).

**Receive an additional discount of \$100.00 per cycle if you purchase 3 cycles in advance. Total cost for 3 cycle plan. \$1,500.00. Payment is required prior to instituting cycle medications.**

(Cost includes Artificial insemination, sperm wash, and prep)

(Cost of treatment does not include: ultrasound monitoring, blood work, medications and cycle management).

**For Patients who do not have IVF insurance coverage:** A global fee of **\$7,650.00** has been established for IVF. Payment is required prior to instituting cycle medications (at baseline).

(Cost of treatment does not include: ultrasound monitoring, blood work, medications, embryo cryopreservation and storage).

All payments and/or financing contracts for fertility services are due in advance of treatment. We will also work with your insurance company to ensure full knowledge of insurance benefits, to maximize coverage of these services.
